

REDUCE OR ELIMINATE YOUR ELECTRIC BILL!

REASONS TO GO SOLAR

⚙️ **Solar Works!** Oregon's mild temperatures provide the perfect environment for solar electricity production.

⚙️ **Solar is Reliable!** No moving parts means low maintenance and panels are backed with warranties up to 25 years.

⚙️ **Solar is Smart!** Solar energy creates a hedge protecting your business against rising electric prices. Utility savings can be used for future business growth.

⚙️ **Solar is Sustainable Renewable Energy!** It will differentiate you from the building down the street and is a unique marketing tool when leasing or selling your building.

⚙️ **Solar is Affordable!** Most solar installs pay for themselves in less than 5 years.

- ⚙️ A 30% federal tax credit. Credit can be taken in first year or spread out over multiple years.
- ⚙️ Solar installations qualify for the 5 year federal depreciation schedule.
- ⚙️ Up to 50% Oregon tax credit. Credit must be taken over a minimum of 5 years, but can be extended out to 13 years.
- ⚙️ Energy Trust of Oregon offers a cash incentive, releasing funds approximately one month after inspection.
- ⚙️ Solar electric systems increase the value of your property but are not included in the assessment of your property value for tax purposes (ORS301.175).
