

SERVICES WE PROVIDE FOR YOUR SOLAR PROJECT

- ▲ A site survey to see if solar makes sense for your building.
- ▲ Calculate and size a solar system based on your electricity consumption and the percentage of your energy bill you want to offset.
- ▲ Estimate tax credits, incentives and energy savings. You will need to consult with your accountant to confirm tax credit incentives, and that you will be able to take full advantage of them.
- ▲ Assistance with filing for credits, incentives and electric company's net metering forms.
- ▲ Evaluate existing roof membrane for anticipated life.
- ▲ Repair, upgrade or replace existing roof membrane if necessary or requested.
- ▲ Arrange for a structural engineer to determine if structural modifications are required, and also to furnish drawings and calculations as required for permits.
- ▲ Provide framing modifications, if any, as specified by the structural engineer.
- ▲ Acquisition of building and electrical permits.
- ▲ Professional installation of your solar electric system.
- ▲ Final installation walk-through along with a system manual.
